Formal ASB Report

Position Assessment:

During the months of March and April, I have helped by creating videos for the leadership team. This includes already working on the end of the year video, such as videoing and editing for girls and boys swimming as well as boys and girls tennis.

Standing Committee:

I am a member in link crew.

Special Committee:

I am in the fencing committee as well as the process of setting up prom and helping that out.

Mentorship Evaluation/Completion at time of Meeting:

My mentorship partner was James Wilkins. James is and always will be a kind and warm hearted person. I have helped him with whatever he needed. This included helping with the website when he was confused. Doing this mentorship evaluation is key to having great relationships with new people and was well implemented into this program.

Concerns:

Only concern I have is prom. I am concerned about it being cold since it is outside and at someone's house. It seems really sketchy but we will see.

Positive comment:

Anthony has been so helpful with just being there for me these months. We eat lunch together and he helps me study and with homework periodically. Anthony is an overall great person and I hope he does the best for his future.

Change:

A change I would like to see is making all students ineligible for prom because it is the one time of the year that shouldn't matter about grades. Students should have fun since it is prom and their senior year.

My impact:

I have changed the world today by filming and editing videos for end of the year video, creating and filming multiple videos for the school and class to see, I was able to impact today's society despite it being so little.
